

TEJO GIRISH JONNAVITTULA

Business & Data Analyst · Supply Chain & Retail Analytics

📍 Chennai, Tamil Nadu, India ✉ tejoogirishj@gmail.com ☎ +91 9360239456 in tejo-girish-jonnnavittula

Summary

Business Analyst with 1+ year of experience in business intelligence, analytics, and process automation. Proficient in SQL, Power BI, Python, and data visualization, with expertise in developing dashboards, automating workflows, conducting KPI and performance analysis, and delivering actionable insights for business growth. Skilled at partnering with stakeholders, solving complex business problems, and transforming data into strategic decisions

Work Experience

TenderCuts — Chennai, India

Apr 2025 – Present

Business Analyst

Aug 2025 – Present

Demand Forecasting & Category Performance

- Owned end-to-end demand planning for assigned product categories, building forecasting models using historical sales, seasonality patterns, and promotional trends across 50+ SKUs.
- Improved forecast accuracy and drove a **13% increase in category-level sales performance** through data-driven inventory planning and procurement alignment.
- Analysed customer purchasing behaviour and demand signals to reduce stock-out risk and minimise wastage across perishable categories.

BI Dashboard Development

- Designed and deployed Power BI dashboards for Revenue & Sales, Marketing Performance, Demand Planning, and Operations — giving cross-functional teams a single source of truth for KPI monitoring.
- Built an executive-level revenue dashboard tracking daily, weekly, and monthly sales trends, category contribution, and regional performance, used actively in leadership reviews.
- Developed a marketing analytics dashboard measuring campaign effectiveness, customer acquisition trends, and channel-wise ROI to support growth initiatives.
- Created planning and inventory dashboards enabling real-time visibility into stock levels, reorder triggers, and supply-demand alignment.

Automation & Data Engineering

- Automated vendor & purchase order invoice processing by parsing emails from a shared inbox, extracting key fields, and consolidating data into a central tracking sheet — removing manual data entry from the workflow.
- Developed a GRN reconciliation automation that parses PDF-based goods receipt documents from supply partners and validates received quantities against purchase orders.
- Engineered an inventory report automation that aggregates daily stock movement data from multiple sources and auto-generates standardised inventory reports for the planning team.
- Automated recurring business reports using Python and SQL, **reducing manual reporting effort by 60%+** and improving data availability across departments.
- Designed ETL pipelines integrating sales, inventory, and operational datasets to support real-time analytics and decision-making.

Stakeholder Collaboration & Insights

- Partnered with Operations, Supply Chain, Procurement, Planning, and Marketing teams to define analytical requirements and deliver actionable recommendations.
- Translated complex data findings into business narratives and presented insights to senior management, enabling faster and more informed operational decisions.

Junior Business Analyst

Apr 2025 – Jul 2025

- Supported demand planning and forecasting activities by analysing sales trends and operational data to assist daily and weekly planning decisions.
- Analysed sales and stock movement data to improve demand-supply alignment across product categories.
- Collaborated with planning teams to monitor inventory performance and track key operational KPIs.

Machine Learning Intern, SmartKnower — Bengaluru, India

Dec 2022 – Jan 2023

- Designed and implemented a neural network for handwritten digit recognition using the MNIST dataset.
- Built and evaluated a CNN model for medical image classification, gaining hands-on experience in deep learning pipelines.

Data Analytics Intern, SRET — Chennai, India

Dec 2022 – Jan 2023

- Conducted end-to-end analysis of movie industry datasets to surface trends and performance insights.
- Developed interactive Tableau dashboards to present findings and support data-driven decision-making.

Education

B.Tech in Computer Science Engineering (Cyber Security & IoT)

2020 – 2024

Sri Ramachandra Faculty of Engineering and Technology, Chennai, India

Projects

Retail Sales Performance Dashboard

- Built an interactive Power BI dashboard monitoring revenue trends, product performance, customer segments, and category-wise profitability across **100K+ order records**.
- Automated monthly KPI reporting, cutting report generation time significantly and enabling self-serve analytics for business teams.

Demand Forecasting & Inventory Planning Model

- Developed time-series forecasting models using historical demand and seasonal trends to improve procurement planning accuracy.
- Delivered inventory allocation recommendations that reduced stock-out incidents and improved supply-demand alignment.

Customer Analytics & Segmentation

- Performed RFM-based customer segmentation using purchase behaviour and order frequency data to identify high-value customer cohorts.
- Produced insights that directly informed targeted retention and marketing strategies.

Heart Disease Prediction Model

- Built classification models (Logistic Regression, Random Forest, Decision Trees) on the UCI Heart Disease dataset achieving **90–95% accuracy** after feature engineering and EDA.

Technical Skills

Analytics & BI: Power BI, Tableau, Streamlit, Matplotlib, Seaborn, Excel (Advanced)

Programming: Python (Pandas, NumPy, Scikit-learn), SQL (Advanced), Google Apps Script

Data Engineering: ETL Pipeline Design, Data Cleaning & Transformation, Workflow Automation

Forecasting: Demand Forecasting, Time Series Analysis, Seasonality Modelling, Inventory Planning

Machine Learning: Logistic Regression, Random Forest, Decision Trees, SVM, Feature Engineering

Databases: MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, Google Workspace (Sheets, Drive, Gmail API)

Certifications

- Data Science Certification – GUVI, IIT Madras Research Park Sep 2024 – Feb 2025
- Foundations: Data, Data, Everywhere – Google (Coursera) Nov 2023
- Introduction to Cloud Computing – IBM (Coursera) Oct 2023
- Java Programming: Solving Problems with Software – Duke University (Coursera) Aug 2023
